

NEOSAN LABS 02

Air Detox

Neutralizes Airborne Toxins, Volatile Organic Compounds (VOCs), Formaldehyde, and Eliminates Odors.

Meets ADA requirements for air detox.

Indoor air quality is considered by the EPA to be one of the top environmental risks to public health. Indoor air is the largest single contact surface, carrying mold, bacteria, viruses, yeasts, dust, and chemical toxins such as Formaldehyde.

NeoSan Labs 02 neutralizes airborne toxins and VOCs that negatively impact our health. It destroys odor-causing compounds originating from pets, putrefaction, spoilage, chemicals, smoking, fire damage, bacteria, and mold.

We innovate, so you can excel.

- Easy to use
- No special equipment or training required
- Wide variety of applications
- Quick turn-around times
- Decreased operating costs
- Supportive global community

- Broad-Spectrum Air Purification Treatment
- Quick Operating Procedure With Fast Onset Of Action
- Neutralizes Chemicals & Volatile Organic Compounds (VOCs)
- Eliminates Irritants That Can Cause Asthma Attacks, Allergic Reactions, And Chemical Sensitivity
- Removes Odors At The Molecular Level
- Safe On All Industry Materials
- 10 Year Shelf Life

NONTOXIC, NONFLAMMABLE, BIODEGRADABLE

*No residual effect on the environment
Safe for humans, animals, and plants*

NEOSAN LABS 02

FOR COLD FOGGING

Specifically designed as an air quality treatment for homes, hospitals, and commercial facilities. NeoSan Labs 02 neutralizes airborne chemicals, volatile organic compounds (VOCs), toxins, and odors without the use of fragrances or encapsulating agents. Compatible with micro-misting cold foggers and ultra-low volume equipment.

NEOSAN LABS 02 comes in two parts that are combined in equal amounts before the application. The active ingredients in Part A compromises the outer layers of the toxins, allowing the active ingredients in Part B to break them down into harmless components. The cleaning solution remains active for 8 hours, then resolves into 100% biodegradable components, leaving no toxins or hazardous waste behind.

NeoSan Labs produces the safest, most powerful, broad-spectrum air detox treatment ever created. So quick and easy to apply, it is widely considered the most cost-effective formulation on the market.
