- Removes Stains & Odors On A Molecular Level
- Safe On Industry Materials
- 10 Year Shelf Life

NONTOXIC, NONFLAMMABLE, BIODEGRADABLE

No residual effect on the environment

Safe for humans, animals, and plants

NEOSAN LABS 03

FOR STEAM CLEANING AND HOT WATER EXTRACTION

This product is a cleaner, deodorizer, chemical agent neutralizer, and color reviver. Formulated for professional use on carpets, rugs, curtains, textiles, and upholstery. Suitable for commercial and residential applications.

NEOSAN LABS 03 comes in two parts that are combined in equal amounts, then diluted at a ratio of 1:9 with water. The active ingredients in Part A comprises the outer layers of chemical toxins, allowing the active ingredients in Part B to break them down into harmless components.

The cleaning solution remains active for 8 hours, then resolves into 100% biodegradable components, leaving no toxins or hazardous waste behind. It is so effective that it also removes chemical byproducts left behind by other shampoos and cleaners.

It eliminates odors originating from pets, putrefaction, spoilage, chemicals, and smoking without the use of encapsulating agents or fragrances. Stains are neutralized on the molecular level, so they will not reappear. Color are revived without the use of brightening agents. It is proven to be non-mutagenic or carcinogenic, and safe for humans, animals and plants.

APPLICATIONS INCLUDE high-traffic carpeted areas in homes, offices, hotels, airports, casinos, restaurants, gyms and fitness centers, performance venues, conference facilities, retail stores and public environments.
