

Ultimate[™]
LAUNDRY

Clean on a molecular level.

99.99999% Effective **HIGHEST IN THE INDUSTRY!**

Did You Know?

- Viruses, including COVID-19, can survive several days on clothes, towels, and bed sheets
- Bacteria can survive for weeks, and even grow, in stored laundry
- According to the CDC, laundry may actually be more dangerous after washing because of the abundance of germs living inside washing machines

Hospital-Grade Laundry Detergent

Standards are higher than ever.

Destroying toxins, bacteria, viruses, and eliminating cross-contamination in laundry protects your family.

NeoSan Labs Ultimate Laundry is a disinfecting detergent that works at lower temperatures, in shorter cycles, and deep-cleans the washer at the same time!

Ultimate **LAUNDRY**[™]
Hospital-grade sterilization.

Disinfectant, Stain Remover,
Brightener AND Softener

No need for additional products!
