

Total reset technology.

Safer, Faster Turnovers.

Easily and efficiently destroy 99.99999% of bacteria, viruses, and pathogens, including COVID-19, between cycles of use.

In high-pathogen environments such as hospitals, long-term care facilities, educational settings, hospitality or athletic facilities, concerns of cross-contamination have never been higher. NeoSan Systems™ combines innovative laboratory science with smart engineering to set a new standard for whole-room disinfection. We engineer and install systems that deliver a nontoxic, broad-spectrum, EPA List N-registered disinfectant, with automated convenience.

Where UV systems miss shadowed areas behind furniture and equipment, our ultra-fine fogging system permeates everywhere. Total Reset Technology™ distributes a precise amount of turbulent aerosol containing micro-droplets of concentrated disinfectant. After only five minutes the micromist is removed and replaced with fresh air, achieving a higher level of efficacy than any other product on the market. Afterwards, staff can safely enter to complete standard preparation protocols.

IDEAL FOR: Hospital Rooms, Nursing Homes, Long-Term Care Facilities, Schools, Child Care Facilities, Gyms And Athletic Facilities, Hotels, Restaurants, Meeting & Conference Facilities, Showers, Restrooms

- Broad-Spectrum Disinfectant
- Prevent The Spread Of Infectious Diseases
- Highest Kill Rate In The Industry:
99.99999% Effective Within Minutes
- Eradicate Germs, Bacteria & Viruses
Including COVID-19
- Prevent Staph Infection & Cross-Contamination
- Create A Lasting Antimicrobial Barrier
- Safe On All Industrial Surfaces
- Eliminate Odors On The Molecular Level
- Neutralize Toxic Chemicals
- Protect Patients, Students, Athletes, Guests,
Cleaning And Maintenance Staff
- Renews Confidence In Travel, School,
And Public Spaces
- Noncorrosive Formula—Formalin, Chlorine,
Carbolic Acid & Heavy Metal Free
- 100% Safe & Environmentally Friendly

V-210331

Automated Delivery Systems

Our built-in decontamination and disinfection delivery systems use breakthrough, patent-pending technology to evenly distribute a nontoxic, 7-log kill disinfecting micro-fog throughout a room. Our technology achieves 100% coverage, even in spaces beyond the reach of sprays, wipes, or UV light. Schedule and track treatment cycles via a secure mobile app. Available for new construction and retrofits for existing commercial buildings. A nationwide network of installers is available. NeoSan Systems™ provides cost effective installation and maintenance with a near-term return on investment.
